

GT

Applications

Gym Tiles are a rubber flooring system designed specifically for gyms and personal training studios. They are a long term, high density, impact attenuating flooring system. Gym tiles do need to be adhered to the sub-base once the outside perimeter is securely locked in place. Each tile can be easily replaced by the owner or removed with ease and re-installed at a different location if/when necessary

Benefits

- Excellent slip resistance even when wet.
- Light perfumed scent added to mask the initial rubber smell.
- Made from Recycled Rubber & coloured EPDM granules.
- Easy, low cost installations and replacement tiles available.
- Excellent cushioned underfoot comfort.
- Non porous cell structured that is completely hygienic
