

## Applications

Lokmat is widely used in working areas – especially where prolonged standing or walking is required – or where oils, chemicals, fats or other similar substances are in use. Ideal as an alternative to rubber mats for schools, warehouses, garages, workshops, showrooms and retail.

## Benefits

- Anti-fatigue and anti-slip mat
- Easy and quick to install
- Interlocking modular design
- Good for back and legs
- Good overall chemical resistance
- Does not conduct heat or cold, nor electricity when dry
- Available with interlocking ramps, edges and corners
- Rot and rust-proof
- Completely hygienic
