

Applications

Loktile's are a multi-function flooring system suitable for any environment where a safety surface is required either permanent or semi-permanent. Available with profiles to suit both wet and dry conditions they can be used in areas such as: workshops, offices, garages, gyms, schools, showrooms, factories and retail environments.

Benefits

- Slip-resistant
- Resistant to UV
- Completely Hygienic
- Easy and quick to install
- Can be loose laid with minimal floor preparation
- Provides excellent insulation properties
- Can withstand forklifts, car tyres and castors
- Available with interlocking ramp edges and corners

Product specifications

Colours: Available in black, cobalt, pewter, emerald and garnet as standard. Other colours are available on request for orders over 100m².

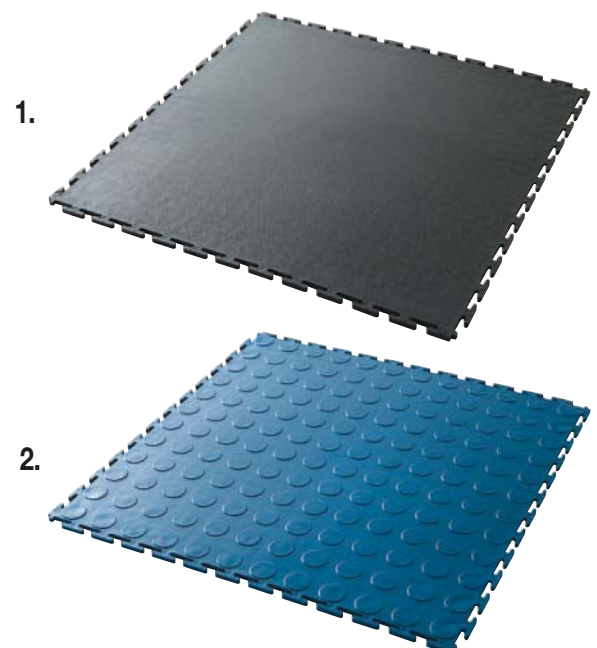

Ramps and Corners are available in colours to suit the above plus they are also available in yellow as standard.

Textures: Available in Granular (flat) and Roundel (dots). Roundel passes Australian Standard for slip resistance in wet and dry conditions.

Hardness: Available in soft as standard. A medium and hard density is available on request.
