

## Product Overview

Jazz is an innovative rubber flooring that replaces the traditional vinyl type flooring in commercial and domestic applications. It offers great underfoot comfort, absorbs walking noise, has excellent non-slip properties and it comes in a fantastic range of colour options to match any interior design.

Three Jazz floor types are available, the Solo range is made using 100% coloured EPDM synthetic and recycled rubbers and the Duo range with 30% recycled car tyre rubber combined with 70% EPDM rubbers. The Jazz range includes Antiequecork, a 100% recycled tyre rubber and recycled wine cork flooring [collected by the Girl Guides] creating a classic new warm-look cork floor that is sure to impress everyone who sees it.

## Specifications

|                      |  |          |
|----------------------|--|----------|
| Material:            | Polymerically bound recycled tyre, synthetic rubbers and wine corks.   |          |
| Density:             | Solo range - 1400 kg/m <sup>3</sup> , Duo range - 1200 kg/m <sup>3</sup> , Antiequecork - 1000 kg/m <sup>3</sup> |          |
| Thickness:           | 3mm as standard, custom thicknesses available on request   |          |
| Length of Roll:      | 10 lineal metres. Longer rolls are available on request  |          |
| Width of Roll:       | 1.1 metres wide only   |          |
| Wet Pendulum:        | Class X, slip resistance   |          |
| Dry Pendulum:        | Class F, slip resistance   |          |
| Braking Force:       | Solo range   | 235N     |
| (AS 2001.2.3.2-2001) | Duo range  | 436N     |
| Fire Rating:         | Solo range   | 10.8 CHF |
|                      | Duo range  | 9.8 CHF  |
| Smoke Value          | Solo Range   | 17% min  |
|                      | Duo Range  | 19% min  |
| Hardness (Shore A):  | 50   |          |
| (ASTM D2240-2003)    |  |          |
| Colours:             | See colour cards   |          |

## Applications

All Jazz floors are monolithic in construction without veneers or laminates and are quick and easy to install. Jazz floors are suitable for many different flooring applications, such as... Retail Shops, Walkways, Gyms, Sports Centres, Offices, Schools, Night Clubs, Rumpus Rooms and all other similar flooring applications. Consult your supplier for the correct thickness and Jazz floor type to suit each application.

**Disclaimer:** The above specifications are derived from periodic tests taken on actual product from the manufacturing process. The data shown above represents the average values and /or performance calculated from these tests. Some variances are possible due to the use of recycled raw materials and common manufacturing tolerances. All users of the product despite our application examples should test for suitability of purpose prior to application. All orders for this product are subject to our standard Terms and Conditions of Sale.
